

- Delivers a unified HD signal distribution solution incorporating both point-to-point wired and IP streaming technologies
- Provides lossless HD AV signal routing over twisted pair copper wire or fiber
- Integrates video, audio, networking, and control over one wire or fiber strand
- Enables high-performance H.264 streaming from any input source up to 1080p or WUXGA
- Provides a built-in CONTENT LAN port for streaming
- Affords full matrix switching with ultra high 12.5 Gbps backplane data rate
- Handles HDMI<sup>®</sup> devices with Deep Color, 3D, 4K, and high-bitrate 7.1 encoded audio
- HDBaseT® Certified device Enables direct connection to other HDBaseT certified equipment
- HDCP 2.2 compliant via 4K input and output cards
- Distributes Full HD 1080p, Ultra HD, and 4K signals via DM 8G+® and HDBaseT connectivity

- Distributes 1080p and WUXGA signals over via DM 8G<sup>®</sup> Fiber or via DM 8G<sup>®</sup> SM Fiber
- Allows streaming of 1080p signals over an IP network with no distance limitations
- Supports first-generation DM® CAT and DM® Fiber products
- Configurable with up to 32 DM, HDBaseT, and/or HDMI outputs
- Configurable with up to 16 streaming outputs
- Easy output expansion using multiple DM switchers
- Modular inputs support a complete range of digital, analog, and streaming signal types
- QuickSwitch HD™ technology manages HDCP keys for fast, reliable switching
- Auto-Locking® technology achieves rapid switching between disparate sources
- Performs automatic AV signal format management via EDID
- Enables device control via CEC
- Allows independent scaling for every display through select output cards and DM receivers
- Distributes and routes USB HID mouse and keyboard signals
- Allows full audio and USB breakaway switching
- Supports analog audio embedding and de-embedding
- Includes integrated Ethernet switch with Gigabit LAN port
- Private Network Mode requires just one IP address for the complete DM system
- Secure access through full user/group management or Active Directory® credential management integration
- Hardware level security using 802.1X authentication
- TLS, SSL, SSH, and SFTP network security protocols
- Includes a built-in web server
- 14-space 19 in. (483 mm) rack-mountable

The DM-MD32X32-CPU3-RPS delivers an advanced 4K60 4:4:4 AV signal routing solution to provide the foundation for a complete DigitalMedia™ system. The DM-MD32X32-CPU3-RPS affords ultra fast switching and lossless distribution of HDMI® and other signals to support digital media players, HDTV receivers, computers, cameras, and display devices. The DM-MD32X32-CPU3-RPS is an enhanced version of the DM-MD32X32-CPU3 featuring three built-in redundant power supplies.

The DM-MD32X32-CPU3-RPS is configurable to handle up to 32 AV sources. The outputs are configurable to provide up to 32 DM, HDBaseT®, and/or HDMI outputs, or up to 16 H.264 streaming outputs, in a single chassis.¹ Based on the 3-Series® platform, the provides enterprise-grade security.

Integrated Ethernet networking and USB distribution provide a complete connectivity solution combined with built-in Crestron® control² for managing the displays and other room devices without any additional wiring. User-friendly operation, setup, and troubleshooting tools are provided through the front panel, or via  $\underline{\text{Crestron Toolbox}^{\text{TM}}}$  software, to allow for easy setup. A web browser interface is also provided.³

#### 4K Ultra HD

The DM-MD32X32-CPU3-RPS is designed to meet the extreme bandwidth requirements for handling 4K and Ultra HD video signals. Support for 4K video also ensures support for the latest generation of computers and monitors with native resolutions beyond 1080p and WUXGA.<sup>4</sup>

# DigitalMedia 8G+® Technology

The DM-MD32X32-CPU3-RPS provides full support for Crestron DigitalMedia 8G+ devices as well as first-generation DM CAT <sup>8,10</sup> and DM Fiber <sup>9,10</sup> products, letting you take advantage of the latest Crestron DigitalMedia 8G+ technology.

A DigitalMedia 8G+ system handles high resolution video signals and can simultaneously distribute stereo and multichannel surround sound signals that support high bitrate 7.1 audio formats as well as uncompressed linear PCM. Signals are transported over one CAT type twisted pair cable or one strand of multimode or single-mode fiber.

### HDBaseT® Certified

Using DigitalMedia 8G+® technology, the DM-MD32X32-CPU3-RPS can be connected directly to an HDBaseT compliant device without requiring a DM transmitter or receiver.

# H.264 Streaming

The DM-MD32X32-CPU3-RPS streaming input capability enables IP cameras and other H.264 encoded sources to be distributed via DigitalMedia alongside HDMI and other non-streaming sources. It also allows DM switchers to be bridged together for simplified routing of HD content between buildings and global offices. Large-scale streaming to computers and mobile devices can be facilitated through integration with a streaming media system such as a Wowza® or Kaltura® media system.

### **Built-In CONTENT LAN Port**

Any streaming input or output may be configured to stream via the CONTENT LAN or LAN port of the DM switcher or via a dedicated CONTENT LAN port of a DMC Series input or output card. Control and content can be combined on a single network or can be isolated onto separate networks.

### Modular Architecture

The DM-MD32X32-CPU3-RPS features a modular architecture with 32 input card slots and 16 dual output card slots. A wide selection of input cards is offered to support a complete range of digital and analog AV signal types as specified in the following specifications table.

### **Output Expansion**

An HDMI pass-through output is provided on every input card to allow the inputs of up to five DM switchers to be daisy-chained, enabling the configuration of very large distribution systems with many outputs. Using five DM-MD32X32-CPU3-RPS switchers, for example, it is possible to support up to 160 separate outputs.

# QuickSwitch HD™ Technology

Digital media signals are typically encrypted to protect against unauthorized viewing. After authenticating displays or signal processors, a source device must issue a key before delivering an output signal. Crestron QuickSwitch HD technology manages these keys to ensure fast, reliable switching and immunity to blackouts.

NOTE: QuickSwitch HD technology requires the use of a scaling HDMI output, which is available on DigitalMedia™ devices such as the DM-RMC-4KZ-SCALER-C and DMC-4KZ-HDO.

# Auto-Locking® Technology

Crestron Auto-Locking technology enables super fast signal switching by instantaneously configuring every device in the signal path as soon as the signal hits the first device. Auto-Locking technology virtually eliminates any noticeable gap while switching.

## **EDID Format Management**

DigitalMedia technology manages the EDID (Extended Display Identification Data) that devices use to communicate to eliminate conflicts that may arise when one source is routed to multiple displays or audio components. Via Crestron Toolbox software, the format and resolution capabilities of each device can be assessed, allowing the installer to properly configure FDID.

### A Scaler for Every Display

Installing select output cards into the DM-MD32X32-CPU3-RPS or connecting a DM receiver with built-in HD and 4k scalers to the DM-MD32X32-CPU3-RPS allows for high-performance scaling. Independent scalers placed at every display device allow for the routing of multiple sources to many different display devices. The Distributed Scaler Approach ensures an optimal image on every screen and allows a high-res computer source to be viewed on any display in the building.

# Versatile Audio Routing

HDMI is the key to handling 7.1 surround sound formats such as Dolby® TrueHD, Dolby Atmos®, and DTS HD Master Audio™. To share these audio sources with multiple audio zones, the DM-MD32X32-CPU3-RPS allows for the simultaneous distribution of multichannel surround sound and two-channel stereo signals from the same HDMI source.

The digital stereo signal is converted to analog to enable sharing via a Sonnex® Multiroom Audio System or any other audio distribution system. The DM-MD32X32-CPU3-RPS also allows surround sound processors and amplifiers to be located centrally instead of at the display location via optional local HDMI outputs.

#### **Built-in Ethernet Switch**

The DM-MD32X32-CPU3-RPS includes an integrated Ethernet switch with a gigabit LAN port. In addition to transporting digital video and audio, a DigitalMedia system can also extend a 100 Mbps Ethernet link to each display and source device via select DM receivers and transmitters, providing high-speed connectivity for any room device that requires a LAN connection. Ethernet is also utilized internally by the Crestron control bus to manage the DM devices in the system and provide display control in each room.

#### Private Network Mode

To streamline its implementation on a corporate or university LAN, the DM-MD32X32-CPU3-RPS employs Private Network Mode to provide a single-point connection for the complete system. Using Private Network Mode, the DM-MD32X32-CPU3-RPS requires just one IP address for the complete DM network.

# **USB Signal Routing**

The DM-MD32X32-CPU3-RPS supports USB HID (Human Interface Device) signal routing so that a USB HID compliant keyboard and/or mouse can provide local control for devices in other locations. HID connectivity is provided through select DM receivers, transmitters, and input cards. Connect a USB over Ethernet Extender host module (USB-EXT-DM-LOCAL 12) to a host that you would like to communicate with and install a device module (USB-EXT-DM-REMOTE 12) at every display location to connect keyboards, gaming controllers, mice, or other devices.

## **CEC Embedded Device Control**

Through its connection to the control system, the DM-MD32X32-CPU3-RPS provides a gateway for controlling many devices right through their HDMI or HDBaseT connections, potentially eliminating the need for any dedicated control wires or IR emitters.<sup>13</sup>

## Web Browser Control

The DM-MD32X32-CPU3-RPS also includes a built-in web server that allows functions such as Ethernet configuration, routing, and firmware upgrades to be performed.<sup>3</sup>

#### Redundant Power Supplies

The DM-MD32X32-CPU3-RPS delivers enhanced reliability through three long-life redundant power supplies. In the unlikely event of a fault with one of the power supplies (indicated by a flashing red LED), the DM-MD32X32-CPU3-RPS will continue to operate on two power supplies. Individual green LEDs show that the power supplies are functioning without fault. The power supplies can also be remotely monitored via Crestron Fusion® software or any control system touch screen.

Upgrading an existing DM switcher that has older multi-gang DMCO-series output cards? Use the online <u>Output Card</u>
Additions and <u>Upgrades Tool</u> to update your existing output cards and switcher to the new single-gang output card format.

Refer to the DigitalMedia Resources webpage at <a href="https://www.crestron.com/dmresources/">www.crestron.com/dmresources/</a> for additional design tools and reference documents.

**HDBaseT** HDCP 2.2<sup>4</sup>, EDID, CEC, RS-232, PoH,

Ethernet

HDMI HDCP 2.2<sup>4</sup>, EDID, CEC

**NOTE:** Supports management of HDCP and EDID; supports management of CEC between connected HDMI and HDBaseT devices and a control system. <sup>14</sup> For additional specifications, refer to the DMC Series input and output card spec sheets.

# **Card Slots**

**1-32** (32) DM switcher input card slots; Each slot accepts (1) DMC-series input

carc

DM OUTPUTS 1-32 (16) DM switcher output card slots; Each slot accepts (1) DMC-series output

card

#### Connectors

LAN (1) 8-pin RJ45 female;

100BASE-TX/1000BASE-T Ethernet port

**CONTENT** (1) 8-pin RJ45 female;

100BASE-TX/1000BASE-T Ethernet port; Provides a dedicated LAN connection for streaming only, used in lieu of streaming via the LAN port of the switcher or the CONTENT LAN port of a DMC Series input

or output card

SERVICE (1) 8-pin RJ45 female;

100BASE-TX/1000BASE-T Ethernet port;

For factory use only

**USB** (1) USB Type A connector, female;

USB 2.0 host port for USB flash drive; For save/load of EDID settings and

firmware update

100-240V~12-5A

50/60 Hz

(1) IEC 60320 C14 mains power inlet; Mates with included power cord

G (1) 6-32 screw, chassis ground lug

COMPUTER (1) USB Type B female;

**(front)** USB computer console port (6 ft cable

included)

#### **Controls & Indicators**

**LCD Display** Green LCD dot matrix, 128 x 64 resolution,

adjustable LED backlight, displays inputs/outputs by name, video & audio signal information, Ethernet configuration

and setup menus

**SOFTKEYS** (4) Push buttons for activation of LCD

driven functions

**HW-R** (1) Recessed push button for hardware

reset, reboots the switcher

**ROUTE** (1) Push button and red LED, selects

ROUTE mode to allow routing changes

**VIEW** (1) Push button and red LED, selects VIEW

mode for viewing current routes

**INFO** (1) Push button and red LED, selects INFO

mode for viewing AV and device info

**MENU** (1) Push button, steps menu back one level

ENTER (1) Push button, executes highlighted menu

or value

**AUDIO** (1) Push button & red LED, selects audio

routing view

VIDEO (1) Push button & red LED, selects video

routing view

**USB** (1) Push button & red LED, selects USB

routing view

Quick-Adjust (1) Continuous turn rotary encoder, adjusts

**Knob** menu parameters

IN 1 - 32 (32) Push buttons and red LEDs, each button selects the corresponding input for

(32) Push buttons and red LEDs, each OUT 1 - 32 button selects the corresponding output

for routing

**POWER** SUPPLIES, 1-3 (3) Green LEDs, each indicates when the corresponding internal supply is functioning

**POWER** SUPPLIES, **FAULT** 

(1) Red flashing LED, indicates a fault with

any internal supply

LAN (rear) (2) LEDs;

Left LED, green indicates 100BASE-TX link

is established, amber indicates 1000BASE-T link is established: Right LED, flashing amber indicates

Ethernet activity

CONTENT (rear) (2) LEDs;

Left LED, green indicates 100BASE-TX link

is established, amber indicates 1000BASE-T link is established; Right LED, flashing amber indicates

Ethernet activity

SERVICE (rear) (2) LEDs;

Left LED, green indicates 100BASE-TX link

# Digital Media<sup>®</sup>

# DM-MD32X32-CPU3-RPS

# 32x32 DigitalMedia™ Switcher with Redundant Power Supplies

#### Notes:

- All output types are configured in pairs except for streaming (a single streaming output occupies the space of two outputs of any other type). To configure a complete DM switcher with output and input cards, use the online DigitalMedia Switcher Configuration Tool. Current DM switchers use DMC-series "single-gang" output cards. For older DM switchers with DMCO-series "multi-gang" output cards, use the online Output Card Additions and Upgrades Tool to update your existing output cards and switcher to the new single-gang output card format.
- Control via the DM network requires a Crestron control system, sold separately.
- 3. Configuration of input cards, output cards, and endpoints is not supported.
- 4. 4K60 4:4:4, HDR, Ultra HD, and HDCP 2.2 are currently supported over HDMI, DM 8G+, and HDBaseT using select input and output cards. Refer to the specifications for each input/output card and each connected device for its full capabilities.
- 5. The maximum cable length for DigitalMedia 8G+ or HDBaseT is dependent upon the type of cable, the choice of input/output card, and the resolution of the video signal. Refer to the "Maximum DM 8G Cable Lengths" table for a detailed overview. Crestron legacy cable models DM-CBL DigitalMedia Cable and DM-CBL-D DigitalMedia D Cable support the same resolutions and cable lengths as CAT5e. Shielded cable and connectors are recommended to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. DM 8G+ is compatible with HDBaseT Alliance specifications for connecting to HDBaseT compliant equipment.
- 6. The maximum cable length for DigitalMedia 8G<sup>™</sup> Fiber is 1000 ft (300 m) using CRESFIBER8G multimode fiber optic cable, or 500 ft (150 m) using CRESFIBER (legacy) or third-party OM3 multimode fiber optic cable.
- The maximum cable length for DigitalMedia 8G Single-Mode Fiber is 7.5
  miles (12 km) using <u>CRESFIBER8G-SM</u> or third-party G.652.D (or better)
  single-mode fiber optic cable.
- The maximum cable length for DigitalMedia CAT is 450 ft (137 m) using <u>DM-CBL</u> DigitalMedia Cable. Actual cable length depends upon multiple factors. Up to two DM Repeaters (Model DM-DR) may be required.
- The maximum cable length for DigitalMedia Fiber is 1000 ft (300 m) using <u>CRESFIBER</u> (legacy), <u>CRESFIBER8G</u>, or third-party OM2/OM3 duplex multimode fiber optic cable.
- Refer to the Crestron <u>DigitalMedia Design Guide</u>, <u>Doc. #4546</u>, for complete system design guidelines. All wire and cables are sold separately.
- Streaming output supports 2-channel stereo audio only. Multichannel surround sound audio sources cannot be streamed unless downmixed to stereo. Stereo downmix capability requires a "DSP" type DM switcher input card, sold separately.
- Any HDMI input can support a DVI or Dual-Mode DisplayPort signal using a suitable adapter or interface cable.
- Item(s) sold separately.
- Control of third-party HDBaseT devices using CEC is only supported via 4K DM 8G+ input and output cards.
- DVI output is supported via an HDMI output port using a suitable adapter or interface cable. <u>CBL-HD-DVI</u> interface cables are available separately.
- 16. Manages the routing of USB HID signals between peripheral DM devices and input cards that are equipped with USB HID ports. Also programmable to manage the routing of USB signals between Crestron USB over Ethernet Extender modules (USB-EXT-DM, sold separately). Refer to the USB-EXT-DM spec sheet for more information.

This product may be purchased from select authorized Crestron dealers and distributors. To find a dealer or distributor, please contact the Crestron sales representative for your area. A list of sales representatives is available online at <a href="https://www.crestron.com/How-To-Buy/Find-a-Representative">www.crestron.com/How-To-Buy/Find-a-Representative</a> or by calling 855-263-8754.

This product is covered under the Crestron standard limited warranty. Refer to www.crestron.com/warranty for full details.
